Execution and Progress Tracking

Thierry Sans

Our software development process so far

Product backlog

- Personas

- User Stories

- Tasks (with brief description, story points, dependencies and details)

Sprint backlogs - for each sprint

- Sprint Plan

- Provisional burndown chart

Tracking progress

Sprint backlogs - for each sprint

- Sprint Plan

- Provisional Burndown Chart

Planning **before** the sprint

- **Taskboard (a.k.a the *Kanban*)**

- **Sprint Execution Report**

- **Actual Burndown chart**

Tracking progress **during** the sprint and **report** after the sprint

The taskboard (a.k.a the Kanban)
